Smaltoplast Thermo

Premium quality Thermo-protective Elastomeric 100% Acrylic Paint

Smaltoplast Thermo is a premium quality thermo-protective, thermo-reflective, water proof elastomeric 100% acrylic paint for exterior use, for painting or repainting exterior surfaces when exposed to adverse weather conditions and for the protection of surfaces with micro cracks. Crack sealing even in cases with very low temperature conditions -20°C without the risk of cracking and flaking. At the same time, it offers the possibility of breathing reflecting more efficiently the whole range of humidity into the wall and energy. Due to its composition, it protects the paint film from growth of fungi and algae especially in humidity conditions. Smaltoplast THERMO combines high whiteness with excellent hiding and covering power spreading rate. Easy to work with. It has excellent adhesion and resistance to alkalis and moisture, as well as high durability against UV radiation. It offers high energy saving coating where it reflects efficiently in the whole range of ultraviolet radiance. Certified as cool-high reflective paint. White and a thousand of pale, pastel and medium shades via Premium Color Moods VECHRO Tinting System!

SPREADING RATE 10-14m²/Lt	DILUTION 0-10%	DRYING 2-4 h	COATING 2	AVAILABLE AT 3Lt, 10Lt
